Summary

A motivated and results-driven Computer Science graduate specializing in backend and frontend development, with recent experience as a Business Analyst. Skilled in programming languages like Kotlin, JavaScript, React, Node.js, PHP and Laravel, alongside data analysis and requirements gathering. Known for problem-solving abilities, attention to detail, and effective teamwork. Eager to leverage technical expertise and analytical skills to contribute meaningfully to dynamic software projects.

Skill Highlights

Programming Languages and frameworks: JavaScript, React, Node.js, PHP, Laravel, HTML5/CSS3, Kotlin

Databases: PostgreSQL, MySQL

Development Tools: Git, Visual Studio, Jira, Docker

Business Analysis: Requirement gathering, data analysis, process mapping

Other: Web application architecture, object-oriented programming, effective written and verbal communication

Professional Experience

Business Analyst Intern – Eclectics International

August 2024 – December 2024

- **Requirement Gathering:** Collaborated with stakeholders to define and document system requirements for internal projects and external, increasing alignment with business needs and reducing rework.

- **Process Mapping:** Developed process maps, user training manuals and process flow diagrams for the various projects within the company, optimizing workflow efficiency and enabling more streamlined user interactions.
- **Stakeholder Communication:** Regularly engaged with cross-functional teams, providing project updates and clarifying technical requirements.

Software Development Intern– Eclectics International

May 2024 – July 2024

- **Backend Development:** Designed and implemented the backend infrastructure of a recruitment portal using Laravel, optimizing system integration.
- **Frontend Development:** Created an engaging and responsive frontend interface with user interface that enhances user experience.
- **Module Integration:** Developed and integrated backend modules for user authentication, data storage, and secure transactions, achieving a system reliability with minimal errors.
- **Project Management:** Coordinated backend and frontend module integration, meeting all Agile sprint deadlines to maintain project momentum and ensure timely deliverables.

Attaché – ICT Authority, Makueni

June 2023 – July 2023

- **IT Support:** Delivered technical support to over 100 users across county offices, achieving user satisfaction through efficient and effective assistance.
- **Network Management:** Addressed and resolved network connectivity issues, ensuring a consistent 98% uptime, enhancing the productivity of office operations.
- **Software Troubleshooting:** Conducted thorough troubleshooting and maintenance of essential software systems, reducing average issue resolution time through proactive problem-solving.

Education

Bachelor of Science: Computer Science – 2020-2024

Jomo Kenyatta University of Agriculture and Technology.

Kenya Certificate of Secondary Education: 2016-2019

Alliance High School.

Certifications

Andela React Learning Program Certificate: **React, HTML5, CSS, Node Js.**

GADS Certificate: **Android Development Using Kotlin**
